9th Study Meeting

University Partnerships in Support of Educational Reforms in the Museum Field: The University of British Columbia's New Master of Museum Education (MMEd) Program

July 28, 2011 / 18:00-20:00

This presentation will discuss graduate-level museum education in respect of the University of British Columbia's partnerships in the Asia Pacific in support of the Museum Education. The presentation will consider the current needs of the field internationally, the rationale driving the development of the new MMEd program at UBC, and the current and future aspirations for partnerships within the Asia Pacific.

Lecturer Prof. David Anderson

Professor and Director of Master of Museum Education (MMEd) program within the Department of Curriculum and Pedagogy, University of British Columbia (UBC), Canada

His research over the last 20 years has focused on the fields of science education and museum-based learning. His interest in visitor learning emergent from experiences in informal contexts (museums, science centres, art galleries, and aquariums) were the focus of his graduate work, as well as other studies in conducted in Australia and the United States, before joining UBC in 2002.
